

EMERGENCY BALLAST WHEN YOUR LIGHTS GO OUT!

Emergency ballast for linear fluorescent applications offer emergency lighting solutions for T5, T8 and T12 lamps, with lumen output capabilities ranging from 500 to 3000 lumens.

We stock a large selection that include ballast designs with reduced profiles for use in shallow compartments spaces or parallel operation capability for additional levels of safety in high-risk applications. We also pre-install in our fixtures for your convenience. Call for more technical information.

LED EMERGENCY BATTERY PACKS

These Battery Packs deliver emergency solutions for LED lighting designs. Call for information.
